Kamil Wiącek

Full-stack developer

Kraków, Poland | +48 781 023 420 | kamil.wiacek04@gmail.com | NIP: 679-33-71-348
Portfolio: https://portfolio.kwiacek.com/

PROFESSIONAL SUMMARY

Full-stack Developer specialising in React Native, with hands-on experience across the full delivery cycle — from implementation based on Figma designs and API documentation, through backend integration, to publishing apps on the App Store and Google Play. In addition, I also develop the server-side component from the very first line of code right through to production deployment. Additional background in IT consulting and Linux administration lets me understand projects beyond just the mobile frontend. I learn quickly, deliver reliably, and communicate clearly with clients and teammates.

KEY SKILLS

- **Mobile:** React Native, React, App Store & Google Play publishing, iOS / Android
- **Frontend:** JavaScript, TypeScript, Vue.js, Tailwind CSS
- **Backend / Integrations:** Laravel (PHP), REST APIs, SQL
- **Tools:** Git, Figma, Jira, Linux
- **Other:** Linux administration, API integration, client-side deployments

PROFESSIONAL EXPERIENCE

Mobile Developer (React Native) | MountDevs Sp. z o.o.

May 2025 – Present | Remote / Gdynia, Poland

- Building mobile applications in React Native for iOS and Android for the company's clients.
- End-to-end delivery: implementation from Figma mockups and API documentation, backend integration, build configuration, and publishing to the App Store and Google Play.
- Working closely with designers and backend developers; daily work with Git, code reviews, and direct communication with clients.

Selected projects:

- **NextOnTrip** (nextontrip.com) — in-house company product, built from scratch. Feature planning with the team, React Native mobile frontend based on Figma mockups, supporting work on the Laravel backend, and release to both app stores.
- **LeadGuru Mobile App** (leadguru.pl/aplikacja) — mobile app delivered from Figma designs and API documentation. React Native implementation, API integration, and publication on the App Store and Google Play.

Junior Consultant | LogicSynergy

September 2023 – June 2025 | Kraków, Poland

- Deploying business applications on Linux systems at client sites — environment setup, installation, and initial rollout.
- Handling incidents and bug reports in Jira: diagnosis, resolution, and communication with clients.
- Writing SQL scripts and queries supporting system maintenance and data migrations.
- Earlier held a trainee position at the same company (August 2023) and a school apprenticeship (April–May 2022).

IT Engineer | CloudAir.tech

April 2023 – September 2024 | Krzeszowice, Poland

- Technical role covering IT infrastructure support and work with operating systems.

Programmer (Internship) | IBM
April 2023 – May 2023 | Kraków, Poland

- Short-term programming internship at an international technology corporation.

Personal Project | Antender (antender.com)
November 2025 – Present

- Co-building a technology project alongside full-time employment.

EDUCATION

WSB Merito University, Chorzów
Engineer's degree in Computer Science | 2024 – 2028 (in progress)

Technical School of Energy, Kraków (Zespół Szkół Energetycznych)
IT Technician diploma | 2019 – 2024

LANGUAGES

- **Polish** — native
- **English** — B2 (working proficiency, comfortable collaborating with international clients)
